

POS LV™

Service & Warranty Program

Peace-of-Mind, No Down-Time

As a fellow industry leader and innovator, Applanix understands your operational challenges, and we know what it means to your business to have peace-of-mind when it comes to hardware and software performance and reliability. Down-time is expensive, and the best way to avoid down-time is to have appropriate warranty coverage. An extended warranty from Applanix provides you and your business with performance peace-of-mind and the minimization of down-time.

WARRANTY PROGRAM DETAILS

- Now available in convenient 3 year increments
- Allows you to plan and pay for hardware upgrades
- That is 3 Years of Extended Firmware and Controller Software Warranty
- Includes one system upgrade at anytime throughout the warranty period. System upgrade includes PCS (latest version available at time of upgrade request), IMU tophat (as applicable to current system), and standard cables
- Two days of onsite training by Applanix staff to allow for training / re-training on new hardware are included

ABOUT POS LV

- Compact, rugged, and environmentally sealed to IP67
- Generates continuous and accurate position and orientation information even under the most difficult GNSS conditions
- Produces precise, high-rate, low-latency, real-time data
- Integrated Trimble GNSS Receiver for centimeter-level positioning
- Operates at normal highway traffic speeds for safe, cost-effective data capture
